

#21 AI HR Job Posting and Candidate Evaluation

HR / AI
Recruitment*End-to-end AI recruitment — CV parsing, scoring, shortlisting, and interview prep*

BUSINESS PROBLEM

HR teams spend 23 hours per hire on CV screening. 75% of applicants are unqualified but still receive manual review time. This workflow parses every CV, scores candidates against a structured criteria matrix, makes shortlist or reject decisions, and triggers personalised outreach — HR only reviews shortlisted candidates.

n8n CANVAS — actual workflow screenshot

INPUT / OUTPUT — exact n8n JSON format

INPUT — Form submission — candidate application via n8n public form

```
{
  "name": "Ahmed Al-Rashidi",
  "email": "ahmed.r@email.com",
  "linkedin": "linkedin.com/in/ahmed-rashidi",
  "role_applied": "AI Solutions Architect",
  "years_exp": 7,
  "cv_file": "[binary PDF upload]",
  "source": "LinkedIn Job Post",
  "applied_at": "2024-06-15T10:14:00Z"
}
```

OUTPUT — Airtable candidate record — AI evaluation result

```
{
  "json": {
    "candidate": "Ahmed Al-Rashidi",
    "role": "AI Solutions Architect",
    "score": 84,
    "recommendation": "SHORTLIST",
    "skills_match": "Strong: Python, LangChain, AWS SAP-C02, n8n",
    "gaps": ["No RAG system at production scale mentioned", "Qdrant/Weaviate experience not demonstrated"],
    "interview_probe": "Ask candidate to describe a RAG system they deployed — probe for chunk size decisions and retrieval evaluation methodology",
    "status": "Interview Invitation Sent",
    "evaluated_at": "2024-06-15T10:14:47Z"
  }
}
```

STEP-BY-STEP — what each node does

#	WHAT HAPPENS	PRACTICAL DETAIL
1	■ Form Trigger — candidate submits application	n8n public form: name, email, LinkedIn URL, role applied for, years experience, CV upload. Fires on submission.
2	■ Airtable — duplicate email check	Searches Airtable for existing record with this email. Duplicate → skip processing, send 'application received' email only.
3	■ Google Drive — upload CV to recruitment folder	PDF stored: /Recruitment/{role_slug}/{candidate_name}_{date}.pdf. Generates shareable link for hiring manager.
4	■ Set — build applicant details object	Constructs: {name, email, linkedin, role_applied, cv_drive_url, application_date, source}.
5	■ Google Drive — download CV binary	Downloads CV PDF binary for text extraction via the Extract from File node.
6	■ Extract from File — parse CV text	Extracts raw text from PDF CV. Handles multi-page, multi-column, and scanned CV layouts.
7	■ AI Agent + OpenAI GPT-4 — CV analysis	Analyses CV text vs job requirements. Uses Airtable Tool to fetch role requirements matrix during analysis.
8	■ Airtable Tool — fetch role requirements	Agent retrieves: must_have_skills, min_years_exp, deal_breakers, nice_to_have for this specific role.
9	■ Structured Output Parser — force JSON	Forces: {score_0_100, skills_match_list, gaps_list, recommendation, interview_probe_questions}.
10	■ IF — shortlisted?	Score 70 or above → shortlist path with interview invitation email. Below 70 → professional rejection with specific gap feedback.
11	■ Airtable — update evaluation record	Writes: score, recommendation, reasoning, status, evaluated_at, interview_probe to candidate record.

CREDENTIALS REQUIRED

CREDENTIAL	WHERE TO GET IT	n8n TYPE
OpenAI API Key	platform.openai.com	OpenAI API
Airtable Personal Access Token	airtable.com/create/tokens → scope: data.records:write,read	Airtable API
Google Drive OAuth2	console.cloud.google.com → Drive API v3	Google Drive OAuth2

SAMPLE RUN — what this workflow processed and produced

Scenario	A technology consultancy open-sourced their AI Solutions Architect role and received 84 applications in the first 5 days. HR had capacity to manually review maybe 20 CVs per day.
Input received	Ahmed Al-Rashidi submitted application at 10:14 via the n8n public form. CV uploaded as PDF: 2 pages, 7 years experience, cloud and AI background.

What the workflow found	CV extracted: Python (5 years), LangChain (mentioned), AWS certifications (SAP-C02 confirmed), n8n workflows (portfolio link). Missing: no explicit RAG production deployment described. No Qdrant or Weaviate mentioned. Score: 84 — above 70 shortlist threshold.
Output produced	SHORTLIST decision in 47 seconds. Interview invitation email sent automatically. Airtable record updated with score, gap analysis, and specific interview probe question. Of 84 applications processed in the first day: 23 shortlisted, 61 professionally rejected with individual feedback. HR review time per application: 0 minutes for rejects, 8 minutes for shortlisted candidates to validate AI recommendation.
